1 Foreword

Thank you very much for choosing our products. We will wholeheartedly provide the best service for you. If you have any questions or requests, please feel free to contact with our technical support.

This manual is for the mobile customer of “iPad Danale”. It is used to teach the users how to install the software on the iPhone and how to use the cell phone monitoring software. With our irregular update to optimize the software performance or introduce new features, it is possible that part of the instruction screen-shots are different with what you are actually using. We will update the new version of user manual without prior notice.

There may be technical inaccuracies or typographical errors in the user manual. We sincerely hope you can give us valuable feedbacks, and we will try our best to enrich and improve it. Thank you for your support.

2 Install Guide

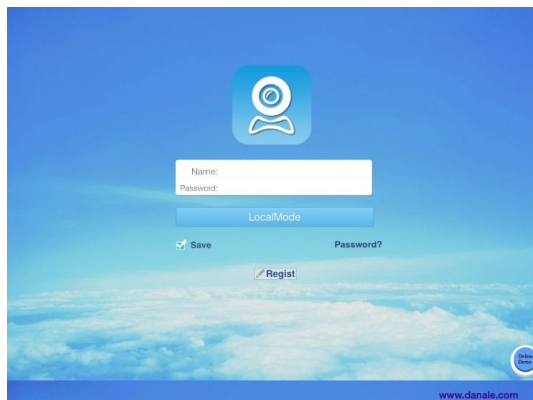

Search and install “DanaleHD” on line from Apple App store. After finish installing, you

will see this icon on the main interface of iPhone.

3 Login interface

Open the software, and you will see the Login interface, as is shown in the following figure:

Here you can view the information of the monitor software, as is shown in the following picture:

10 FAQ

① Why cannot I watch the surveillance video after entering the login information?

A、 Please check whether the settings page, server, port, user name, password and other information are filled in correctly.

B、 Please check your network to see whether your phone is connected to the external network .

C、 If your device is connected to the external network via router, please check whether the mobile port mapped in the routing . (For mapping settings, please refer to the router manual).

D、 Please check whether the IP address you have filled in is the LAN IP (If your IP starts with the following format, it is a local area network : 10.xx 、 172.xx、 192.xx. If you

use such IP, you can only be in the same LAN with the device to be connected).

E、 Please check your port to ensure that it must be the mobile port.

② Sometimes why does longer delay occur, or is it disconnected easily?

A、 Network conditions are bad.

B、 Video frame rate and resolution are too high, because lower surveillance video can improve the smoothness and stability effectively (Note: There are a number of encoding settings for these parameters. when setting, you must make sure your phone supports it . For different equipments, the adjustment methods are also deferent. For more detailed methods, please refer to the corresponding device's operating instructions.).

③ Why can't the PTZ work after entering the main interface?

A、 Please ensure that the channel supports PTZ.

B、 PTZ responses delay, please wait for a moment.

④ When connected with some multi_channel devices, why can I only play max 3 channels at the same time?

Answer: Some models of the monitoring equipment have connection limits. When the total number of connections reaches the upper limit, you can not open more channels to watch. Please check the device's settings panel or manual to see whether the limits can be changed, or you can also contact with the device manufacturer's technical support.
